CYNERGY SKINCARE ENSURES HOLLYWOODS ELITE LOOK THEIR FINEST
Skin brightening, cooling and tattoo removal products as part of the official 2010 Emmy Gift Bag

BUFFALO, NY- Cynergy Products, LLC develops HQ+, GLY+, and Revitalizing+ skincare products nationwide. An exclusive preview, Cynergy introduces Nature+ Skin Lightening, Revitalizing+ Herbal Mask and ElimInk tattoo removal as part of the official 2010 Emmy Awards Style Lounge.

The Emmy Awards honor the achievements of television's most illustrious programs. The 62nd annual Primetime Emmy® Awards Show will take place in Los Angeles, CA at the Nokia Theatre on Sunday, August 29. Some of the nominees for this year include Larry David of *Curb Your Enthusiasm*, Steve Carell of *The Office*, and Jim Parsons of *The Big Bang Theory*. As a preview to the ceremony, Secret Room Events sponsors top exclusive products at the 2010 Emmy Style Lounge. Innovative clothing, jewelry, travel and health products are shown to Hollywood's finest, receiving a gift bag at the event pre-show. Chosen by the Secret Room Events team, Cynergy Products will feature its contemporary skincare line and cutting edge Tattoo Removal system.

Cynergy's Nature+ Skin Lightening cream and Revitalizing+ Cooling Herbal Mask ensure a lasting youthful skin glow. With its brightening effects, anti-aging effects and UVB/UVC filter protection for your skin, Nature+ gives a brighter skin complexion. Using licorice and mulberry ingredients, highly effective for their whitening and skin protection properties, Nature+ is the ideal cream that aids in lightening brown spots while giving protection against everyday environmental stress. While Nature+ brightens the skin, the Revitalizing+ Cooling Herbal Mask creates a treatment that calms, soothes and hydrates as it softens and tones the skin. Alcohol and fragrance free, Revitalizing+ gives a cooling and refreshing glow on all skin types with its formulation of Algin Seaweed Extract and herbal remedies.

As Cynergy's first eminent recognition, owner of Cynergy Products, Gail Perillo comments, "This will give Cynergy Products its first exposure to the global market. In our tenth year, Cynergy's simple to use, high quality solutions for skincare provide maximum skin glow and beauty. We're excited to showcase our products and thank the National Academy of Television Arts & Sciences and Secret Room Events for this sponsorship".

New from Cynergy Products is the ElimInk, the tattoo removal system designed to eradicate old and unwanted artwork on the skin when color memory has faded. Certified ElimInk technicians implant the product into the tissue over the original tattoo, removing immediate color. Most laser tattoo removal products specifically pick up blue and black ink hues, leaving an unwanted tint in the skin. ElimInk is not color specific, with the ability to remove all color hues used in ink application. With the use of Derm Renew, a scar inhibitor, ElimInk ensures a clean elimination. Unique to other treatments, this tattoo-over treatment offers a clean and safe removal.

About Cynergy Products, LLC

Cynergy Products, LLC was established in 2000, to work with physicians and skin care experts across the country to create HQ+, GLY+, and Revitalizing+ products. All products are developed to pair with physician treatment, allowing for decreased down time after and between treatments, improving overall skin results. Cynergy Products prepare and condition skin prior to Laser procedures, Face-Lifts, Dermabrasion, TCA, Glycolic and other Chemical Peels. Cynergy Products has recently expanded to an international level, bringing more products while maintaining cutting edge skincare.
